- c. Australia is the biggest island.
- d. The USA is richer than any other country.
- e. Cobra is more poisonous than any other snake.

**PART-B**

**Answer any Five questions**

**7x5=35 Marks**

**1. You have to consult a doctor for getting his advice on the choice of nutritious diet. (5x1=5)**

You are a Vegetarian. How will you meet the Medical counseling from the doctor?

**2. Make a Precis of the following and give a suitable title. (5x1=5)**

There is an enemy beneath our feet - an enemy more deadly for his complete impartiality. He recognizes no national boundaries, no political parties. Everyone in the world is threatened by him. The enemy is the earth itself. When an earthquake strikes, the world trembles. The power of a quake is greater than anything man himself can produce. But today scientists are directing a great deal of their effort into finding some way of combating earthquakes, and it is possible that at some time in the near future mankind will have discovered a means of protecting itself from earthquakes. An earthquake strikes without warning. When it does, its power is immense. If it strikes a modern city, the damage it causes is as great as if it has struck a primitive village. Gas mains burst, explosions are caused and fires are started. Underground railways are wrecked. Buildings collapse, bridges fall, dams burst, gaping crevices appear in busy streets. If the quake strikes at sea, huge tidal waves sweep inland. If it strikes in mountain regions, avalanches roar down into the valley. Consider the terrifying statistics from the past 1755: Lisbon, capital of Portugal - the city destroyed entirely and 450 killed. 1970: Peru: 50,000 killed. In 1968 an earthquake struck Alaska. As this is a relatively under populated part, only a few people were killed. But it is likely that this was one of the most powerful quakes ever to have hit the world. Geologists estimate that during the tremors, the whole of the state moved over 80 feet farther west into the Pacific Ocean. Imagine the power of something that can move an entire subcontinent! This is the problem that the scientists face. They are dealing with forces so immense that man cannot hope to resist them.

**3. Develop the following hints into a readable passage and give a suitable title. (5x1=5)**

A rich farmer - lot of land - cattle and servants - two sons - happy life - After some years younger son unhappy - asked for his share of the property - wouldn't listen to father's advice - got his share - sold them all - went away to another country - fell into bad ways - soon all money gone - poor - no one to help him - understood his mistake.

**4. Describe your friend a place you visited recently or intend to visit shortly. (5x1=5)**

**5. Read the following passage carefully and answer the questions given below. (5x1=5)**

Gandhiji visited many small villages in India. He did not go by car or bus but walked. He stayed with people in their homes and helped them in many ways. They loved him very much and called him Babu. He was the father of all poor people in India. Many people in India loved him and many people in foreign

countries loved to him too. Hindus, Muslims, Christian and many other people called him 'Father' and he loved them all.

- a. Where did Gandhiji's stay during his visit to the villages?
- b. How did he go from one village to another?
- c. Why was he called Babu?
- d. Did he help the people?
- e. Gandhiji was loved by.....

**6. Answer the following questions in a sentence.**
